Re: Black Creek Water Resource Development Project

Dear Mr. Zammataro,

I have owned property in Keystone Heights since 1996. The lakes have been at low to very low levels for over 20 years. I am aware of the Black Creek Project and understand that the status of Lake Brooklyn will be changed from a clear water lake to a tannin water lake.

Please accept this letter as a statement of my full support of the Black Creek Water Resource Development Project. I appreciate the hard work and efforts of our elected officials and the SJRWMD staff and look forward to seeing the completion of the Black Creek Project.

Sincerely,
